Summary

Final-year Computer Engineering (English) student with hands-on experience in Python-based backend development and AI-focused projects. Proficient in building RESTful services with FastAPI, developing RAG-based solutions using LangChain, and working on computer vision applications. Seeking a back-end/AI developer role where I can contribute to scalable, production-ready systems. Additionally, experienced in developing backend applications using the Java Spring Boot ecosystem.

Technical Skills

Backend & AI: Python, FastAPI, LangChain, RAG, OpenAI API

AI Tools: FAISS, LangGraph, MediaPipe

Computer Vision: OpenCV, YOLOv8

Java Ecosystem: Java, Spring Boot

Databases: PostgreSQL, MySQL

Dev Tools: Git, Docker, Postman, Firebase

Education

Istanbul Arel University – B.Sc. in Computer Engineering (English) 2022–Present

Associate Degree in Web Design and Coding 2020–2022

Akdeniz University – Surveying and Mapping 2018–2020

Work Experience

Software Engineering Intern – FEV Türkiye Feb 2026 – Present

- Developed RESTful APIs using Python and FastAPI

Java Backend Developer Intern – CodeFirst Company 3 Months

- Developed and tested RESTful APIs using Spring Boot
- Designed MySQL database schemas for data management

Projects

Hatched Area Violation Detection YOLOv8, OpenCV, ByteTrack, Shapely

- Built video pipeline for vehicle detection in restricted road zones
- Achieved 85%+ detection accuracy
- Implemented multi-object tracking and severity scoring
- Designed modular architecture with 35 components

Palmora – AI Palm & Astrology Reading App FastAPI, LangChain, OpenCV, SwiftUI

- Built FastAPI backend for AI-generated palm readings
- Implemented RAG pipeline with LangChain and FAISS
- Developed palm line detection using MediaPipe and UNet

Additional Information

Military Service: Completed

Languages

English: B2
